EVERYPIXEL

PRESS RELEASE
FOR IMMEDIATE RELEASE · NOVEMBER 12, 2026

Everypixel closes its stock image search to focus on AI video

Its AI video workspace takes the search engine's place at www.everypixel.com.

November 12, 2026. Everypixel is closing its stock image search and is focusing on its AI workspace for professional video makers. Everypixel Workroom is now Everypixel, at www.everypixel.com.

For years, Everypixel searched dozens of stock sites at once, helping people find the right image among millions. AI has changed how visuals are made: more and more people now create their own images and video for work. That brings a new challenge: managing a set of AI tools that keeps growing, each with its own capabilities and quirks. The question is no longer where to find the right image, but whether AI will deliver exactly what they intended.

A search engine can't answer that question, but Everypixel Workroom can. Alongside its search, the company has been developing this AI workspace, where professional video makers turn an idea into finished footage. That is why Everypixel decided to close the search and hand its name and address to Workroom. From now on, it is simply Everypixel.

Everypixel says goodbye to its stock search and thanks everyone who used it over the years.

For Everypixel Workroom users, nothing changes: their accounts and credits stay the same, and links to workroom.everypixel.com now lead to www.everypixel.com.

> "AI video started as a technology race. But viewers don't see the technology. They see the video, and in a few seconds they decide whether it deserves their attention. Every pixel still matters."
>
> Dmitry Shironosov, CEO of Everypixel

ABOUT EVERYPIXEL

Everypixel (formerly Everypixel Workroom) is an AI workspace where professional video makers turn an idea into finished footage. Its focus is consistent, client-ready results, without extra rounds of trial and error. This comes from a careful selection of AI models and from Skills, in-house production recipes that use each model at its best. Everypixel is available at www.everypixel.com.
